

# Pixelated Pathways

**!WIP**

This page is a WIP (work in progress) and is a bit disorganized and all over the place. Bear with me, I am working on this.

Welcome to "Pixelated Pathways!" The go-to place for internet stuff. Some links, some guides and some [spider webs](#). I like free stuff and open-source stuff, so most of what is included on this page carries these attributes.

NOTE: Although this page mostly consists of unordered style lists, there had been thought and effort put into them so you can say they are somewhat curated, so work your way through from start > finish.

## Purpose

I would say that for me, the purpose of this page is to share information and links and to also act as a point of quick reference if you need something. Everything (well most) of what is included on this page I have used and or are using, so I would say that it is somewhat curated by experience.

The info/links on this page is semi organized (what's included and what I want to still implement is very broad so this becomes a bit difficult) but I would suggest either Use the "Table of Contents" to see and quickly navigate to what you want or take some time and explore the entire page! (You never know you might end up learning something new or discover something useful!)

## Epic Knowledge Bases

## Windows: Ricing, Privacy, Customization & Optimization

Windows Ricing, Privacy, Customization & Optimization. Windows security, performance, productivity and customization.

Go check out this guide I made: [Windows: Ricing, Privacy, Customization & Optimization](#)

#### ❗ !!BEFORE DOING ANYTHING DO THIS FIRST:

Create a Bootable USB Recovery Drive for Windows 10, this is essebtial as you could use it to recover or troubleshoot your system in case something goes wrong. This guide covers Ricing, Debloating, Privacy, Custom & Optimization tweaks which all has the potential to maybe just break something. Though this should not happen so don't worry, these tweaks, scripts, software and etc have been tested and used by a lot!

**ALSO: Make a habit of creating System Restore Points often:** [How to Create a System Restore Point in Windows 10](#)

**ALSO: Make a habit of creating Backups of you Registry often:** [Create a Backup of the Entire Windows Registry](#)

#### 💡 My thinking for the general direction of this guide/repo is the following:

1. First I'll start with the **debloating** and **privacy** stuff, after all it is ideal to have a nice clean system for the next
2. Then I will move on to somewhat a mixture of traditional **ricing** along with **tweaking** and **optimization**
3. And lastly I will recomend some general **software** to have

This will not be a too in depth guide as **a lot** of the resoures I will provide has guides or steps whithin them or is just straight forward and instructions is not needed or is provided on their site.

## Windows

*some important and must have top level stuff for windows*

#### 💡 Good to Know:

**Use the System File Checker tool to repair missing or corrupted system files:** If some Windows functions aren't working or Windows crashes, use the System File Checker to scan Windows and restore your files. (**NOTE:** This doesn't replace the fact that you **should** always make a system restore point before changing things)

1. Open an elevated command prompt.
2. Type the following command, and then press Enter. It may take several minutes for the command operation to be completed.

```
DISM.exe /Online /Cleanup-image /Restorehealth
```

3. When it has completed type the following command, and then press Enter.

```
sfc /scannow
```

4. A system restart might be required.

[Sophia Script for Windows](#) - ↴ *The most powerful PowerShell module on GitHub for fine-tuning Windows 10 & Windows 11*

**This is basically the same thing as the previous but it's the script and not an app. The script is a bit autonomous so I suggest rather using the app SophiApp**

[O&O AppBuster](#) *Bust Apps you do not want!*

[Bulk Crap Uninstaller](#) *Remove large amounts of unwanted applications quickly.*

[Revo Uninstaller](#) *Uninstall unwanted programs and their leftovers, quickly and easily!*

[Uninstalr](#) *Uninstalr is the best Windows uninstaller - Uninstalr is a fast, lightweight and accurate way to uninstall software in Windows.*

That basically covers it for the first section. With these tools you now should have a nice clean, debloated, optimised and fast system.

### SECOND:

[privacy is sexy](#) *Enforce privacy & security best-practices on Windows, macOS and Linux.*

[Optimizer](#) *The finest Windows Optimizer*

Privatezilla  Performs a privacy & security check of Windows 10

O&O ShutUp10++ Free antispy tool for Windows 10 and 11

and that's the second part. You should now have some robust security, privacy, anti-telemetry, anti-data-collection, anti-spying, and so one...

### THIRD:

- [WPD](#) WPD is the most convenient way to configure various privacy settings in Windows.
- [WindowsSpyBlocker](#) Block spying and tracking on Windows

# Saving Digital Legacy

So I got the idea for the title of this section from [this page](#). This section is about the obtaining and archival of digital media and digital content. Some of what I put in this section has its own guides and lists so I suggest going through them to understand what you're doing and how to do it. It is also **highly** suggested that you go through this section in the order it is laid out!

## 4. Adblocking / Privacy / Filter Lists

For a full list of "Adblocking, Privacy, VPN's, Proxies, Antivirus" visit: [FMHY Adblocking / Privacy](#)

## Extensions

**Note: It is a MUST to have either of the first two, either "uBlock Origin (uBO)" OR "AdNauseam".**

- [uBlock Origin \(uBO\)](#) An efficient content & ad blocker

- [AdNauseam](#) (*Built on top of "uBlock Origin"*) obfuscate browsing data and protect users from tracking by advertising networks
- [ClearURLs](#) *ClearURLs is an add-on based on the new WebExtensions technology and will automatically remove tracking elements from URLs to help protect your privacy.*
- [Bypass Paywalls Clean](#) *Extension allows you to read articles from (supported) sites that implement a paywall.*
- [I still don't care about cookies](#) *Debloating fork of the extension "I don't care about cookies"*

## Recommended Settings

Open your adblocker(uBlock/AdNauseam) settings page and navigate to the "Filter Lists" tab:

## Filter Lists: How to add

1. Open your adblocker(uBlock/AdNauseam) settings page.
2. Navigate to the "Filter Lists" tab.
3. Scroll to the bottom and click on "Import".
4. Paste(one per line) the urls to your chosen Filter List .txt file(the RAW file).
5. Once done, click on "Apply Changes" at the top.
6. You can update the built in settings and your own imports by clicking the clock icon next to them.

## Start with

Some sources/guides to get you started

- [yokoffing's Recommended Filters](#) *Collection of blocklists to fill in the gaps*
- [FMHY Adblock Filters](#) *FMHY Recommended Adblock Filters*
- [Filter Stalker](#) *@LukeThighStalker's Filter List*
- [OISD - Domain Blocklist](#) *The blocklist prevents your devices from connecting to unwanted or harmful domains. It reduces ads, decreases the risk of malware, and enhances privacy.*

## Other Filter Lists Providers/Hubs/Collections

These are nice to know

**Official:** (these should be covered in your adblocker(uBlock/AdNauseam) if your settings is turned on for them)

- [uAssets](#) *Resources for uBlock Origin, uMatrix: static filter lists, ready-to-use rulesets, etc.*
- [EasyList / EasyPrivacy / Fanboy Lists](#) *EasyList filter subscription (EasyList, EasyPrivacy, EasyList Cookie, Fanboy's Social/Annoyances/Notifications Blocking List)*
- [AdGuard Filters](#) *AdGuard Content Blocking Filters*

## Community:

- [liamengland1's miscfilters](#) *liamengland1's Miscellaneous Filters*
- [knapah's uBlock Origin Filter list](#) *A curated list of adblock filters for various purposes. This list includes filters for ad and tracker blocking, anti-anti-adblock, anti-Facebook, anti-paywall, and more.*

## My Top Recommended Filter Lists

These are my top Recommended Filter Lists to import in your adblocker(uBlock/AdNauseam).

These links are to where the Filters Lists are located, click the "Raw" button just top right of the file contents to get the link to the RAW .txt file. (If the link is to a repo just follow the instructions or look for the .txt Filter List file in the repo at the top of the page)

adblocker settings page > Filter Lists tab > Scroll to bottom > click "Import" > add the links to the RAW .txt files one per line > click "Apply Changes" at the top

- [Actually Legitimate URL Shortener Tool](#) *In a world dominated by bitLy, adfLy, and several thousand other malware cover-up tools, this list reduces the length of URLs in a much more legitimate and transparent manner. Essentially, it automatically removes unnecessary \$/& values from the URLs, making them easier to copy from the URL bar and pasting elsewhere as links. Enjoy.*
- [FMHY Filterlist](#) *FMHY Filterlist, Blocks Unsafe Sites listed in unsafe sites.*
- [FMHY Filterlist](#) *This filterlist blocks unsafe sites listed in the unsafe sites list.*
- [Hide YouTube Shorts List](#) *A uBlock Origin filter list to hide all traces of YouTube shorts videos.*
- [oisd big](#) *Block. Don't break.*
- [privateersclub's FMHY Unsafe Sites/Software](#) *privateersclub's FMHY Unsafe Sites/Software*
- [ClearURLs for uBo](#) *Want to use ClearURLs' tracking protection without installing another extension? This list is a (unofficial) version of the ClearURLs rules, designed for use in uBlock Origin and AdGuard. This ONLY includes the URL parameter removal functionality from ClearURLs, and not the other functions.*

## Other Recommended Filter Lists

Same instructions as the previous "My Top Recommended Filter Lists"

- [HaGeZi's The World's Most Abused TLDs](#) *The Top Most Abused Top Level Domains, merged from HaGeZi, Yokoffing, DandelionSprout and SpamHAUS*
- [The malicious website blocklist](#) *This list aims to protect against scams, phishing, malware, some stalkerware, and potentially unwanted programs (PUPs). It includes a version of vxvault.net's list, modified by me to work in adblockers.*
- [Dandelion Sprout's Anti-Malware List](#) *This list goes the extra kilometer to prevent more malware than other mainstream anti-malware lists. It blocks heavily abused top-level domains (and even search engine results for them), blocks domains used in malware redirection trains and in domain parking schemes, blocks sponsored Windows PUP nags on PC guide articles, uses mass blocking of domains belonging to bad IPs, and has many other subcategories that give it a solid advantage over similar lists out there.*
- [Browse websites without logging in](#) *Are you tired of being nagged on by websites, that say "Log in to read more"? With this list, you'll be much less nagged on from now own.*
- [Anti-paywall filters](#) *Filters for news websites, including filters to defuse paywalls, subscription/newsletter nags, annoying modals, anti-adblock, and empty ad spaces on news websites*
- [HaGeZi's Pro mini DNS/Browser Blocklist](#) *Size-optimised version for DNS/Browser adblockers. This list only contains domains from the Pro full that have been found on Top 1M lists (Umbrella, Cloudflare, Tranco, Chrome, ...) in the last 12 months.*
- [yokoffing's Annoyance List](#) *Hide annoyances and extraneous page elements ("related articles", "read more", etc.) not covered by other lists*
- [Web Annoyances Ultralist - unsuck the web!](#) *Fix and remove annoying web elements such as sticky headers, floating boxes, floating videos, dickbars, social share bars and other distracting elements.*
- [NoADS\\_RU](#) *list for blocking elements on Russian-language, and not only, sites*
- [yokoffing's click2load filters](#) *click2load filters*
- [Block third party fonts](#) *Block most third-party fonts. Allows for Material Icons and WOFF fonts in order to not break sites.*

## Guides

### yt-dlp

Instructions for Windows

1. Download <https://github.com/yt-dlp/yt-dlp/releases/latest/download/yt-dlp.exe>
2. Download <https://github.com/yt-dlp/FFmpeg-Builds/releases/download/latest/ffmpeg-master-latest-win64-gpl.zip>
3. Create a folder somewhere easily accessible, you will navigate to this folder each time you want to use yt-dlp
4. Put the 2 downloaded files in that folder
  - Open "ffmpeg-master-latest-win64-gpl.zip" and extract "ffmpeg.exe" and "ffprobe.exe" into your chosen folder (they are in the "bin" folder)
  - You should now have "yt-dlp.exe", "ffmpeg.exe" and "ffprobe.exe" in your chosen folder
5. Download a video
  - In the address bar of your chosen folder type cmd and press enter
  - Then in the terminal window that opens, type `yt-dlp "URL"` replacing URL with the link u want to download
  - Wait for your video to finish downloading
  - It will download into your chosen folder
6. Learn More
  - Skim through the documentation <https://github.com/yt-dlp/yt-dlp#readme> to learn about more features
  - The following page/guide is also very useful: <https://www.mankier.com/1/yt-dlp>

Open the [visual guide](#) in a new tab and have a look at it for extra guidance!
